About Me

I am a third-year Bachelor's student with a strong eagerness to work on production-level code and gain hands-on experience in real-world applications. I am a fast learner, adaptable to new challenges, and passionate about developing efficient and impactful solutions. Although I had to pause my studies due to financial constraints, this situation has only strengthened my determination to contribute to high-level projects in a top-tier company and excel in the tech industry. My focus is on turning challenges into opportunities to grow and succeed professionally.

Experience

Job Experience

- I have one year of front-end development experience, focusing on a clothing webstore , where I honed my skills in responsive design, UI/UX, and JavaScript-based web solutions.

Hand on Experience

- E-Commerce Web Design Page
